

5 Steps towards the new reporting portal goAML

Step 1: Pilot

FIU Curaçao started a pilot in June 2020 with a selected group of reporting entities to test the new goAML webform and to get feedback from the reporting entities from the different sectors.

The goAML system is quite different from CORSYS, thus entities need to prepare for a new way of reporting per January 2021

Step 2: Training - How to register your entity, 16 - 20 November 2020

Each and every reporting entity needs to (re-)register in goAML. During this virtual training you will be guided on how to register your entity successfully in goAML.

Step 3: Register your entity, starting 23 November 2020

As per November 23rd you will be able to actually register your entity in the new portal goAML.

How? The FIU will provide you a link as of the 23rd of November.

Please note that you will need to continue to report via CORSYS until the 1st of January 2021.

Step 4: Training - How to report in goAML 30 November - 4 December 2020

During this virtual training, the FIU shall guide and train you on how UTR's must be reported correctly and timely with the goAML portal. The training will be provided for each sector specifically.

Step 5: goAML goes LIVE! 1 January 2021

Starting the 1st of January 2021 all reporting entities will need to report via the new reporting portal goAML

The old reporting portal CORSYS will not be accessible as of the 1st of January 2021!!!
